Under its vertical domain the company offers quality solutions for Manufacturing, Multi Level Marketing, Jewellery, NGO's, Insurance, Healthcare and the Retail Segment. Horizontal domain includes a wide range of services such as Re-engineering, ERP implementation, Product migration and Enterprise Knowledge Management Systems. The specified suite of enterprise applications is meant to address all functions of a vertical segment or a horizontal market segment across verticals. In addition to powerful capabilities, the leading edge technology of the Agni Business Application Solution produces ease of use, flexibility and helps your company gain competitive advantage.

SERVICES

Agni Software offers a number of services for your business; some of them are listed below:

✦ **Offshore Software development:** If your business requires a solution, we can build it for you. Our technical team has worked on a number of industry domains and has provided solutions to customers worldwide. We specialize in the following domains:

  ▪ Insurance
  ▪ Financial Services
  ▪ Manufacturing
  ▪ Healthcare
  ▪ Retail
  ▪ Supply Chain
  ▪ NGO

✦ **Software Consulting:** You may need to evaluate your business to find out what you need, in terms of IT infrastructure and solutions. Let us talk to your managers and operating staff – we'll use our vast resources of experience and previously built solutions to help you build what's required.

✦ **Joint product development:** Do you have an idea for a product but require technical support? We can build the product with you.

✦ **System Analysis, Architecture and Design:** We can analyze your business requirements, and, in co-ordination with you, design applications that will suit your purpose. And even suggest changes in process that will help automate your business better.

✦ **Marketing Services:** Need help in marketing your products or your services? We'll help you build IT infrastructure to support your marketing team, and also give you ideas on avenues to market and support your products.

✦ **Support Services:** You built it, but you don't want to hire more people to support it? We're there for you – we'll train our personnel to support your product, both on email and on the phone.

✦ **QA and Documentation:** Sometimes building a product can be overwhelming, especially in the areas of product quality and documentation. We have experience in both areas, and can extend our team to provide Quality Assurance services, and help you with documentation.
